

Session Title: Digital Technology to achieve Efficiency and Decarbonization

Name: Antonello Monti

Position: Professor at RWTH Aachen University

Abstract title: How to develop a service driven energy ecosystem

Digitalization is radically transforming the energy system. A key change is given by the redefinition of the role of the customers. Putting the customers at the center means changing completely the concept of energy products moving toward a service-driven ecosystem. What are drivers behind this changes? How can we enable them?
