

Session Title: The co-hosted event by UNIDO

~Achieving global carbon neutrality

– collaboration with developing and emerging nations~

Name: Clara Landeiro

Position: Asia-Pacific Manager, Climate Technology Centre & Network (CTCN)

Abstract title: International Cooperation in the Areas of Technical Assistance and Capacity Building – A closer look at the UNFCCC Technology Mechanism

Since the creation of the UNFCCC Technology Mechanism in 2010, countries have reiterated the importance of strengthening international cooperation on technology development and transfer to developing countries to achieving global carbon neutrality. As the Mechanism's operational arm, CTCN promotes the accelerated development and transfer of climate technologies by providing technical assistance at the request of developing countries, as well as capacity development, knowledge sharing, and networking opportunities. This presentation provides a closer look at how the mechanism has been utilized since its origin, and the key role of its growing network of technology centres, organizations and private sector entities.
