

Session Title: The co-hosted event by UNIDO

~Achieving global carbon neutrality

– collaboration with developing and emerging nations~

Name: Hicham Bouzekri

Position: Director of R&D and Industrial Integration

Abstract title: Morocco championing an ambitious and inclusive national renewable energy program with regional impact

Morocco's renewable energy national plan has set the standard for many developing nations with a region leading target of 52% of installed electricity generation capacity from renewable sources by 2030. MASEN's approach to achieving this target is an overarching program that not only builds world-class renewable energy plants, but also develops local sourcing from competitive national industries, improves the quality of life of neighboring communities and effectively contributes to build a market oriented R&D ecosystem. Noor Ouarzazate Demonstration Platform hosts leading edge technology deployments that contribute to technology transfer and capacity building for Moroccan & African partners alike.
