Career history

Natalie Samovich, head of Research and Innovation, Resilient Group, Enercutim, co-founder MCPV.eu

Natalie is heading EU Research and Innovation projects based in Lisbon, Brussels and Amsterdam within digitalisation in the energy domain, green hydrogen and DER RES at Solar Demonstration platform and Solar Lab platforms. The Solar Demonstration Platform was co-founded in 2011 and established an innovative shared renewable infrastructures awards nominated model.

Natalie Chairs Working group on Smart Energy at the Alliance of IoT Innovation (AIOTI), member of SB. She chairs ETIP-SNET platform Working Group 1 on EU Smart Grids. Meanwhile, Natalie is developing spin-off ventures in digitalisation of energy and advanced manufacturing of the next generation PV. Her research interests are related to digitalisation in energy, interoperability and the related business models, renewable energy systems, Internet of Things impact on energy systems and the related socio-economic impact issues within smart grids. Industry 4.0 and 5.0 topics are closely related to her work.
