Safety Paradigm Shift

Today's nuclear is
already safe.

Safe if Perfectly
Operated

Scalable

Safe by Design

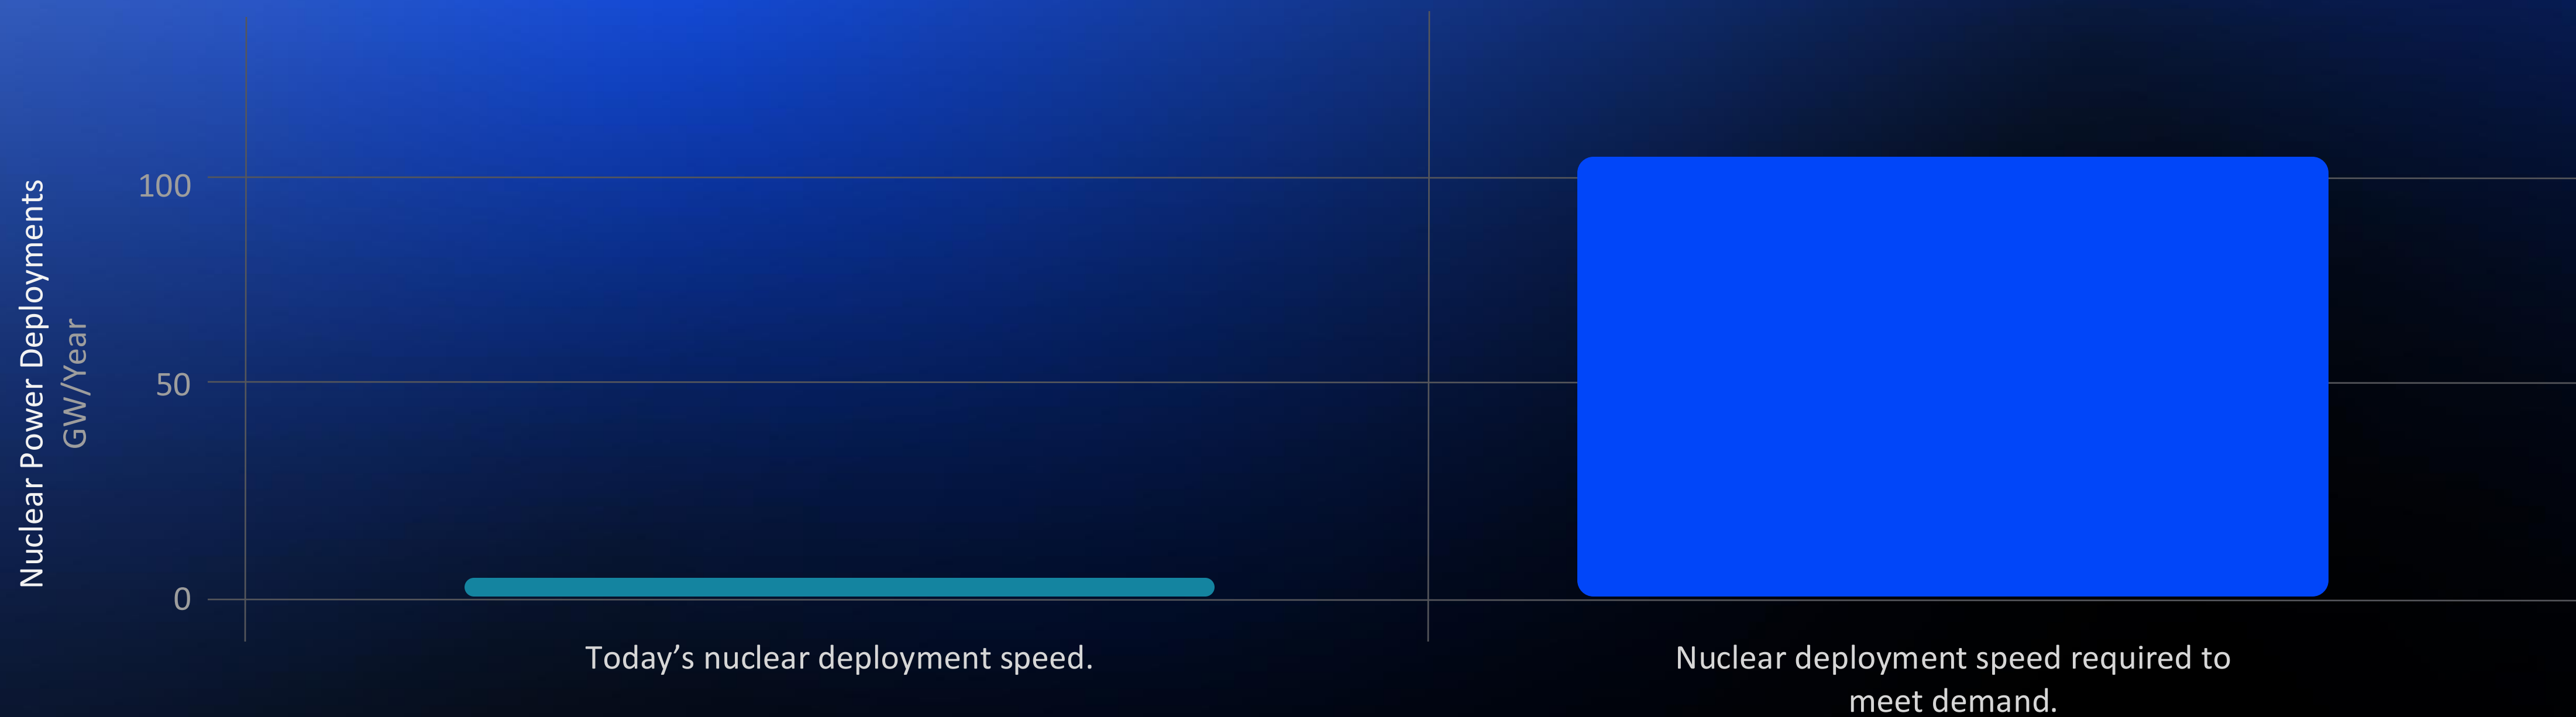

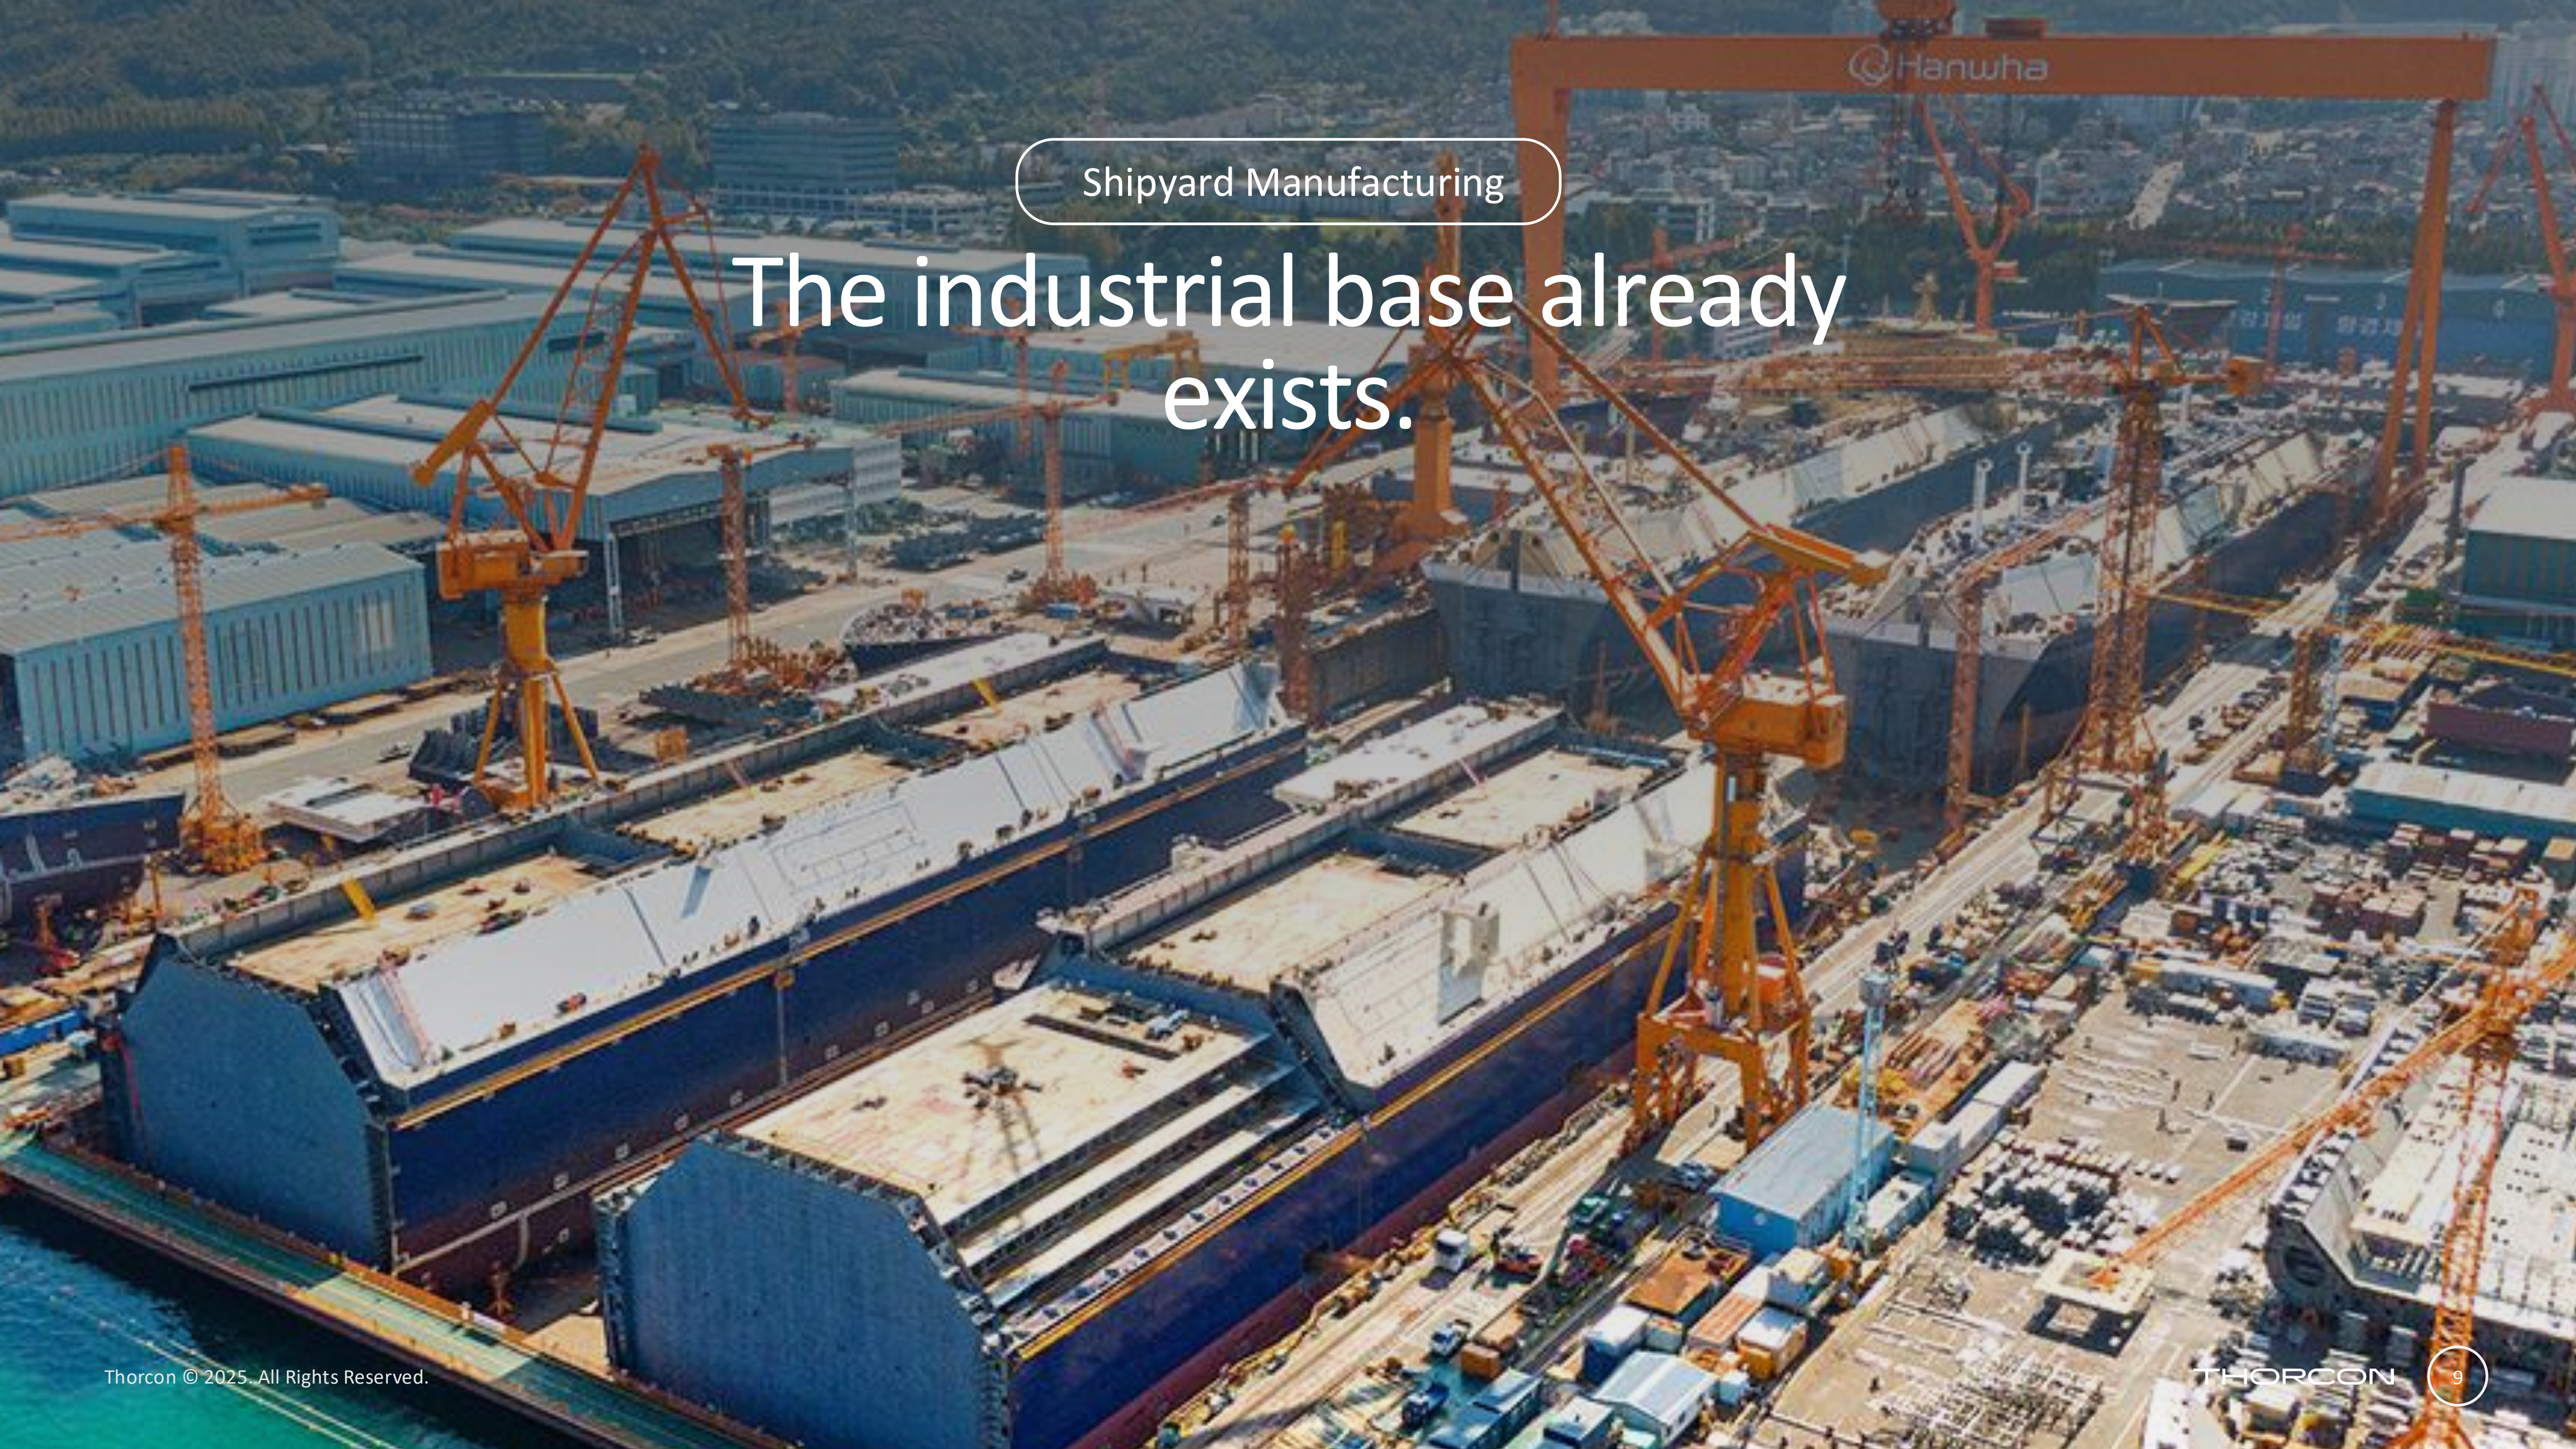

Energy Demand Hotspots

Affordability – The Real Battleground

The developing world will demand the vast majority of new generation through 2050.

Speed to deployment is not a nice-to-have. It's mission critical.

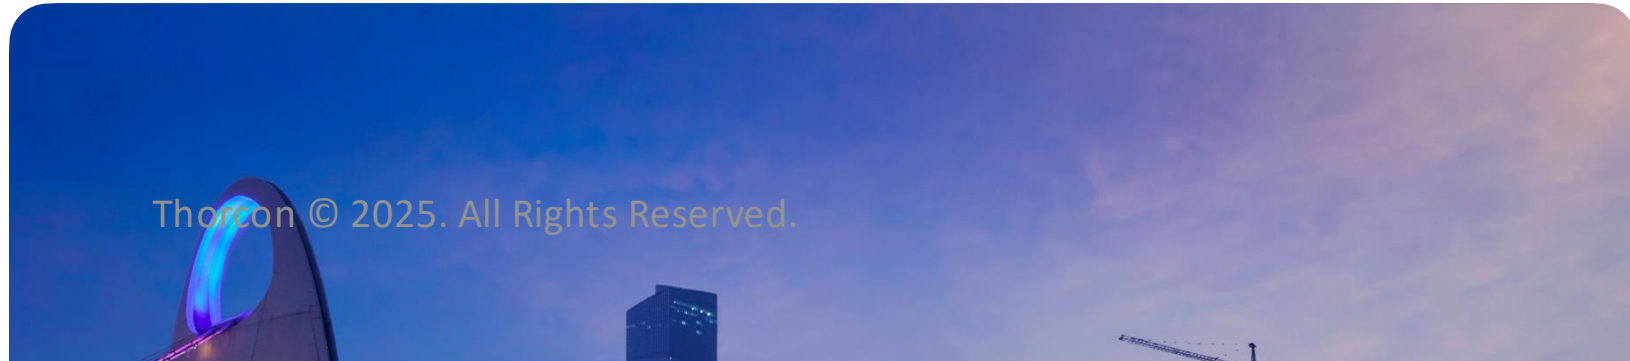

Shipyard Manufacturing

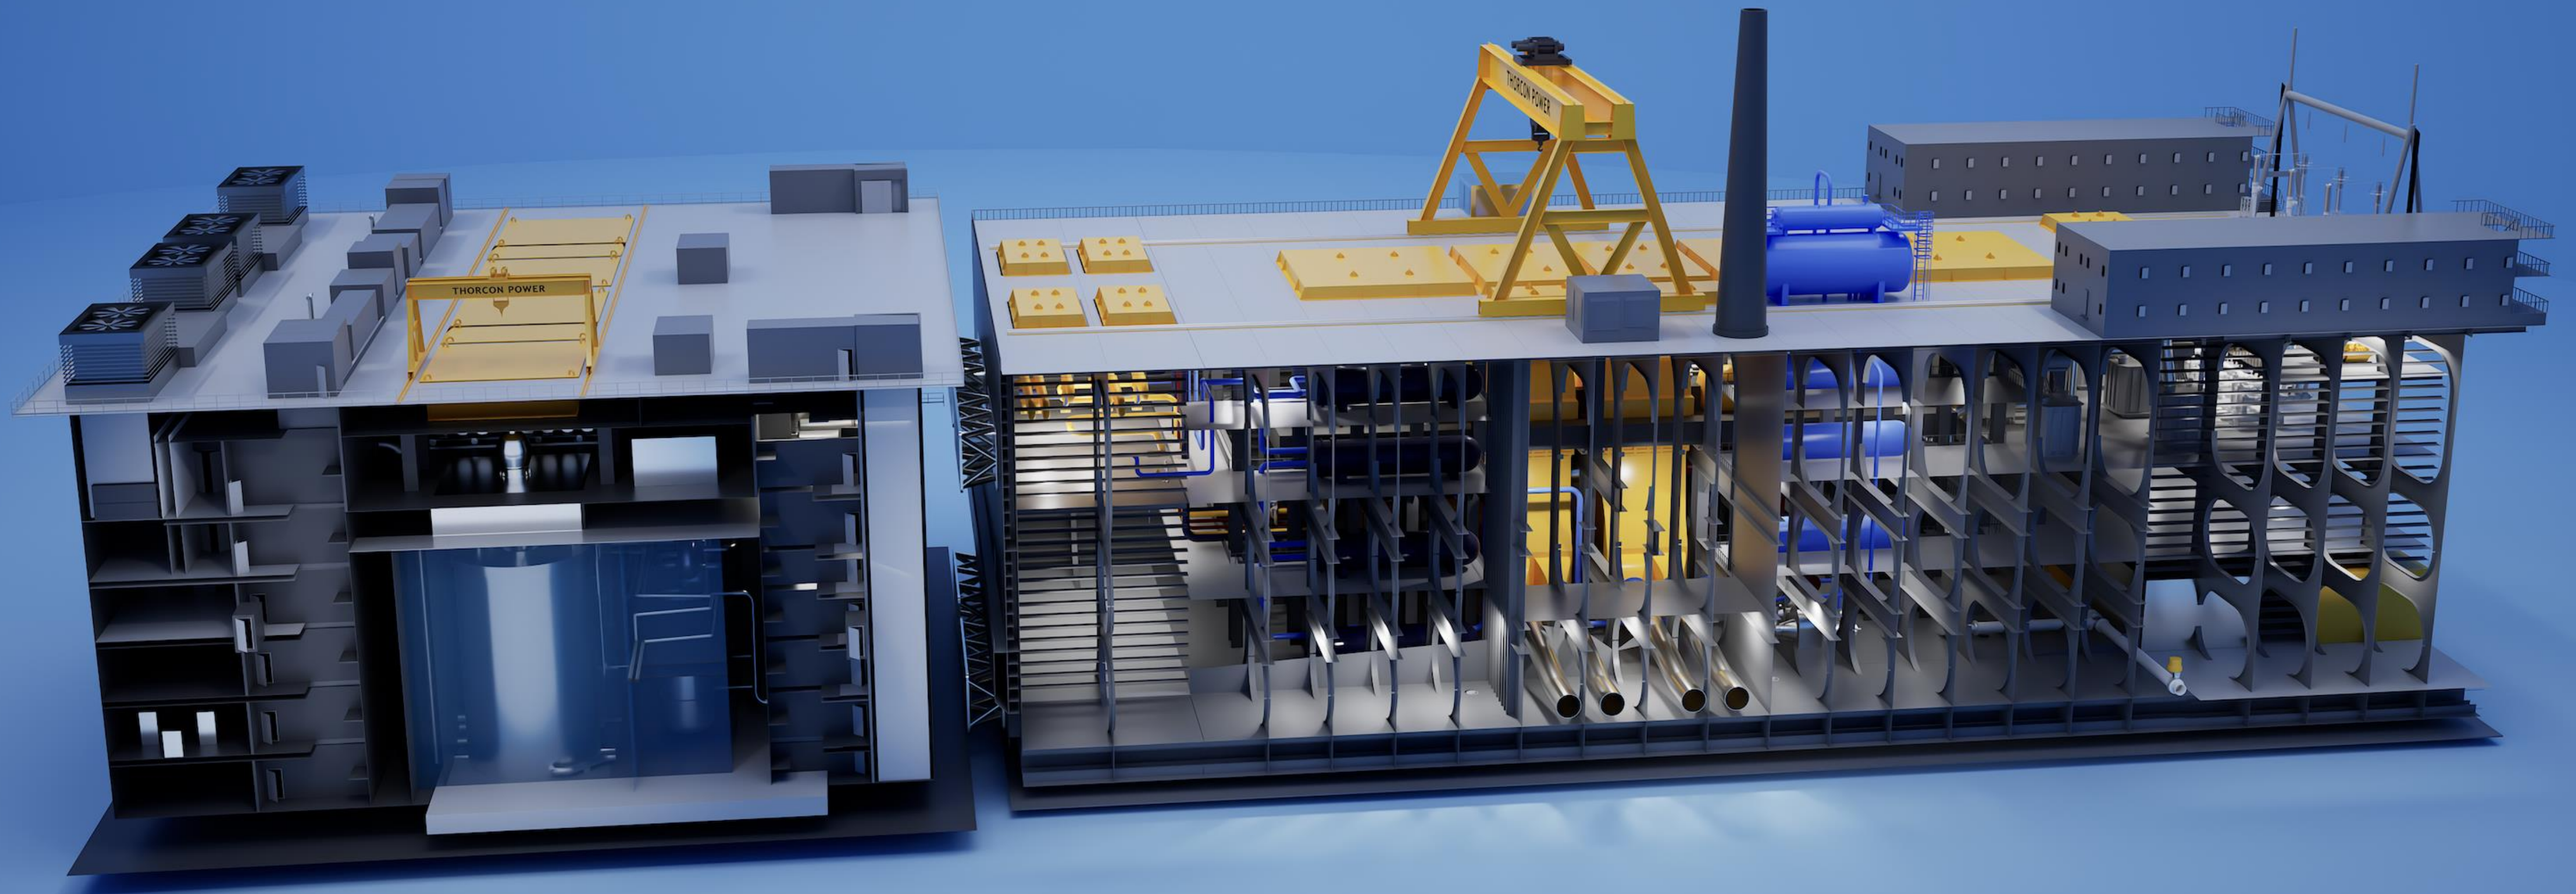

The industrial base already exists.

A world within reach.

Meet THORCON

From designing supertankers to
reinventing nuclear.

One of several ULCC's designed and built by Thorcon Founder, Jack Devanney.

Thorcon's Molten Salt Reactor System
